ABOUT US

Back in the 70’s when 4WD’s were few and far between, three adventure seeking mates got their ‘off road thrill’ with customised FJ40s, F100s & Rovers. Each fitted with custom made bull bars, roll bars and sand tyres – they drew the attention of friends and bystanders. Before long, Lloyd Taylor, Cliff Jones and Steve Mollenhauer were making hand-made custom bars for a growing number of fans. As the demand continued to grow, they decided it was time to get serious.

In 1973, with little more than their combined initials, shared passion and appreciation for quality products - TJM was founded and the rest is history. They were pioneers and TJM became the first company in Australia to manufacture and distribute quality 4WD equipment.

Our product range has extensively grown to include; steel and alloy bull bars, nudge bars, side and rear protection bars, side steps, trade racks, roof racks, TJM recovery equipment, TJM winches, TJM XGS suspension, Airtec snorkels, TJM Pro Lockers and TJM roof top tents & awnings.

While TJM has grown to be a sophisticated operation, we have never forgotten the key elements that resulted in the formation of the brand.

Trust; from the quality of manufacturing.

Pride; in our innovative designs.

Adventure; heading out from suburbia and experiencing the wonders of our unique and breathtaking country, Australia.
FEATURES OF AN OUTBACK BULL BAR

TJM Outback bars employ a multiple fold channel/wing design. Folds are deliberately spaced across the channel for maximum strength and stylish looks. The upswept tapered wing provides excellent approach angle for accessibility.

Recessed L.E.D. fog lights come standard along with recessed polycarbonate indicators & park lights.

TJM bull bar uprights feature a single piece of steel which extends from the upright down through the bumper channel to the chassis mount, maximising strength. 40mm Cato straps soften the edges and add to the aesthetics.

TJM bull bars provide secure, strong and stable mounting points to fit a large array of driving lights. The strength of the TJM product guards against excessive movement resulting in a vibrating beam pattern, bulb failure or light body fatigue.

TJM’s channel design allows maximum airflow to the vehicles radiator. These vents as well as the viewing hole on the top of the channel also allows easy access to the vehicles winch controls.

Vehicle mounted aerials are often essential when travelling in remote locations. TJM bull bars feature two heavy duty aerial tabs located behind the bars top cross tube.

TJM’s mounting system is specifically engineered for each vehicle. The design spreads impact and winching loads evenly across the vehicles chassis. The design ensures the bull bar is strong enough for extreme conditions and functions properly in impact events.

Integrated recovery points rated to 8000KG in a straight line pull when used with a 8000KG equaliser strap and 2 x 4.75T bow shackles. (Certain TJM bull bar models may not incorporate this feature).

The engineered winch frame mount accommodates a variety of winches and does not interfere with the vehicles air bag triggering system. The bar is designed and tested to endure the heavy stresses of winching.

T-slot recovery jack points allow a TJM recovery jack to be mounted directly onto the bull bar. (Certain TJM bull bar models may not incorporate the T-slot feature).

Many TJM bull bars come standard with integrated lower wing & centre guards. Additional Front, Sump & Transmission guards are also available separately depending on vehicle.

The new Outback bar for Mazda BT-50s 2011+ features 63mm diameter tubing.

Certain TJM bull bar models may not incorporate all features. New model Outback bull bar now features 63mm diameter tubing.

TJM Airtec snorkels
Snorkels are commonly the first accessory ever fitted to a four wheel drive. They assist with water crossings and provide hassle free air induction when immersed in dust. Air is cooler and cleaner at roof level than air travelling via the bonnet, which means greater fuel efficiency and less clogging of air filters. These are important factors, particularly when 4W Ding on dry, dusty roads.

TJM Airtec snorkels are manufactured at the highest level. All products are made with leading Australian polymer materials that exceed the Australian Standard for UV stabilisation of UV8, with ratings at UV20-UV24. The colour pigmentation process doesn’t cut any corners either, giving you an even, dense and bleed-free product.

Unlike other manufacturers, TJM individually engineer and design the snorkel to suit the natural shape of the vehicle. Although functionality is important, we want you to look good too!

Proudly Australian made and quality assured, you can have the confidence that a TJM Airtec snorkel will achieve peak performance each and every time.

How a TJM Airtec snorkel disperses rain water

- Rain water drops entering the air ram of a TJM Airtec snorkel is captured at the back of the inside curved surface, pooled around the base of the air ram and dispersing through the drain holes.
- In the off chance that any minute rain water droplets find their way into the snorkel body, they will be atomized at the air filter.
- Finally, the last line of defence is the original water drain in the vehicle’s air cleaner assembly.*

Air Ram 011AR14897T shown

*It is important that the complete Airtec unit is positively sealed to ensure no water ingress at any point.
TJM XGS Series 4000 suspension
Whether you’re tackling corrugated roads, rough terrain, or you need to tow a caravan across the country, a TJM XGS Series 4000 suspension kit will improve every aspect of driving from road handling, braking ability, cushioning the ride from bumps and ruts, noise and vibration whilst also protecting the vehicle and its contents from wear and tear.

TJM Torq winches
TJM’s range of new generation Torq winches now have even more power for increased line speed and fast recovery. Stringently tested and utilising the highest standards in engineering design and manufacturing, you can count on a TJM winch when you’re in trouble. For those who enjoy a challenge, owning a TJM winch provides you with the freedom to visit more places. When you’re off the beaten track, stuck and lacking traction, it’s not always as simple as relying on a mate with traction to bail you out. Using a TJM winch is a much better way to successfully retrieve your vehicle.

TJM recovery equipment
Every situation is unique, and the right equipment and a well thought out plan are the key ingredients to successful vehicle recoveries. Designed by engineers and manufactured to the highest standards, TJM recovery equipment gets you out of trouble. Should you become bogged, stuck or immobile, TJM recovery gear becomes your backup plan to ensure you can continue your journey.

TJM dual battery systems
TJMs range of international award-winning battery management systems will help you avoid the inconvenience and possible dangers of running your battery down.
Aeroklas are on the cutting edge of canopy manufacturing and development being the first company in the world to offer Engineered ABS Double Shell Canopies.

Both the inner and outer shells are moulded together to bring you twice the strength and durability than a single skinned canopy, featuring a higher impact resistance and ability to reshape after impact.

Available in dual and space cab, the Aeroklas canopy is painted using OE quality paint giving it such a perfect, glossy and flawless finish.
**LED dome light**
- LED interior light with rear door switch

**C-Clamp system**
- Easy to fix and requires no drilling into the vehicle body

**Track mount roof bars**
- Allows the fitment of roof racks with a loading capacity of up to 80kg

**Handle lock & keys**
- Large size, strong and easy to hold
- Key alike to windows

**Window options**
- Lift up side windows available

**LED brake light**
- Built in and fixed to rear window to provide safety while driving

---

**We've set the standard AS 1235; 2000**
All dual cab canopies have successfully achieved a rated load capacity of 100kg.

**Robust roof rack mounts**
A dual layer of 4.5mm fibre reinforced composite greatly increases the thickness and strength.

**Smooth exterior**
A smooth, high gloss, durable finish in gel coat white, coupled with optimum UV protection ensures a maintenance free exterior.
We started it
Founded on mateship in 1973, TJM is the Aussie pioneer of 4WD equipment.

We’re tried and proven
Australia’s rugged, yet diverse landscape has provided the ideal testing ground. Whether your journey takes you on or off road, for work or play, TJM has the gear you can depend on.

We’re tough, yet sophisticated
Using the latest engineering and manufacturing technology, our products are exposed to stringent testing and thorough quality assurance procedures to guarantee our customers receive nothing but the best.

Everybody wants a piece of us
Our research and development team brings leading-edge and performance-driven products. We’re the experts not just on our home turf but also offshore, so it’s not surprising TJM’s Aussie innovations are exported around the globe.
TJM IS WHERE YOUR JOURNEY BEGINS WITH OVER 60 STORES AUSTRALIA WIDE, STOCKING THE LARGEST RANGE OF THE BEST BRANDS
